

MONDOLFO FERRO — MT3650UPC

SEMI-AUTOMATIC DATA INPUT WHEEL BALANCER WITH POWER CLAMP

MT3650UPC / Digital Wheel Balancer With 2 Plane Data Entry

MT3650UPC-A / Same as Above With Light Truck Cone Kit

MT3650UPC-B / Digital Wheel Balancer With 3 Plane Data Entry and Light Truck Cone Kit

MT3650UPC-C / Same as Above With Collets and Lift

MT3650UPC-B
Model Shown

Automatic wheel clamping system, with constant torque, for shorter operative times and higher centering accuracy.

DESCRIPTION

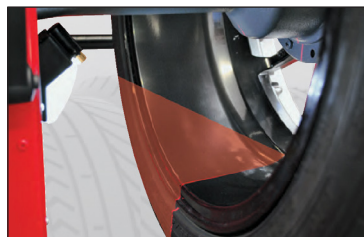

- Electronic wheel balancers for cars, lightweight transport vehicles and motor vehicles.
- Designed to allow maximum access to inside the wheel. The numerous weight-holder trays, compartments for cones and accessories and the adjustable monitor guarantee maximum work ergonomics. The tray is made of highly resistant materials. The anvil can be used to prepare or regenerate clip weights without damaging the weight tray.
- The side accessory compartment has been designed to store universal flanges, cones and bushes.
- The new wheel guard allows use with wheel sizes up to 44".
- Sized to work with high offset wheels without the need for additional spacers. Automatic brake at the end of the spin. Reduced cycle time and high performance. The "zero" maintenance motor and highly innovative design solutions guarantee reliability, sturdiness and high work loads.
- LED spotlight to light-up the work area and make it easier to clean the rim, check the wheel and apply weights.
- Adhesive weights can be positioned extremely rapidly using the laser pointer at 6 o'clock.
- Quick and intuitive sensitivity calibration. The sample weight is applied directly to the spin unit, ensuring maximum precision and eliminating operator error.
- Automatic wheel positioning to the point where the balancing weight has to be applied and electrical positioning brake (RPA). Electronic input of wheel diameter and distance with AUTOSELECT function which automatically activates the balancing programs, avoiding keypad selection.
- Three modes to position the adhesive weights: with the weight holder clip (optional), with the 6 o'clock laser indicator or manually at 12 o'clock.
- Program for concealing counterweights behind spokes for improved wheel aesthetics. Program indicating ideal wheel/tire assembly position to reduce overall wheel imbalance. Automatic calculation of the width.
- Wide-screen monitor ideal for displaying high resolution graphics and dedicated software. As standard, the Easy Weight program suite which includes Minimum Weight. This software allows a significant reduction of balancing weights, through the analysis of different threshold values, according to the vehicle type: fast or slow (unique on the market).

SPECIFICATIONS

Machine Weight	445.5 Lbs
Rim Diameter	11" - 28" / 1" - 35"
Rim Width	1.5" - 20"
Maximum Tire Width	23.6"
Maximum Tire Diameter	44"
Maximum Wheel Assembly Weight	165 Lbs
Power Supply	110 V / 1-P / 50/60 Hz
Tire Rotation Speed.....	90-130 RPM

3 Modes to position the adhesive weights: weight holder clip (optional), 6 o'clock laser indicator (optional), or manually at 12 o'clock.

LED spotlight to light up the work area and make it easier to clean the rim, check the wheel and apply weights. The adhesive weights can be positioned extremely rapidly using the laser pointer at 6 o'clock (optional).

**SURGE PROTECTION RECOMMENDED
FOR ALL WHEEL BALANCERS**
